RIT028 ordering-code and housing reference - prepared reference

Applicability

RIT028 ordering code in both language tables. No frequency/chip claim is derived from the conflicting RIT004 heading.

RIT028 ordering-code and housing reference

The source tables explicitly identify ordering code RIT028, while their generic headings say RIT004. This page uses the ordering-code evidence for RIT028 and does not introduce RIT004 as an equivalent model.

The short bilingual sheet supplies housing size and ABS material only. Confirm the actual RFID chip, operating band, attachment method and intended reader before qualifying the tag; those details are not established by this sheet.

Before handover

- Confirm the actual merchandise fit and delivered electronic-insert configuration.

- Verify the selected store gate/reader and the applicable checkout handling process.

Document information

This is an independently prepared English reference based on the reviewed technical material. It is not a manufacturer-issued original, does not replace the delivered hardware instructions and does not add a manufacturer warranty or certification.
